## **1. Aims**

Our school aims to:

- Provide and maintain a safe and healthy environment
- Establish and maintain safe working procedures amongst staff, pupils and all visitors to the school site
- Have robust procedures in place in case of emergencies
- Ensure that the premises and equipment are maintained safely, and are regularly inspected

## 2. Legislation

St.Stephen's International School is mainly under the supervision of the Ministry of Education, Thailand. Consequently the Private Education Act and National Education Act apply. These Acts focus on the Health and Safety matters regarding young children and the provision of a safe and clean environment. Facilities and buildings are under the charge of the following agencies: Ministry of Education and Ministry of Labour Management & Welfare. The District Office is the government sub-agency that works closely to the school that locates at that area.

Secondly, the Thai labor law is implied for all employees (Thai & Foreigners) and their working conditions. As a specialist field, other government agencies work in minor areas. Legislation from the following government organisations also apply to St. Stephen's International School.

1. Social Security Fund, Ministry of Labour Management and Welfare
2. Department of Labour Protection and Welfare, Ministry of Labour Management and Welfare
3. Department of Construction, Ministry of Labour Management and Welfare
  - 3.1 Labor Law
  - 3.2 Trainings of Fire Drill and Evacuation
4. District office (Chatuchak District), Bangkok Governor, Ministry of Interior
  - 4.1 Department of Public Health
  - 4.2 Department of Environment
5. Private School Act, Ministry of Education (Formal Schools)
  - 5.1 Working Protection
  - 5.2 Supervision
6. Department of Industrial Products' Standards, Ministry of Industry
7. Department of Water Supply Authority of Thailand, Ministry of Interior
8. Department of Electricity Authority of Thailand, Ministry of Interior
9. Police Bureau, Ministry of Interior
10. Department of Transportation, Ministry of Transportation.
11. Ministry of Energy

## 3. Roles and responsibilities

### 3.1 The school board

The school board has ultimate responsibility for health and safety matters in the school, but will delegate day-to-day responsibility to The Principal.

The school board has a duty to take reasonable steps to ensure that staff and pupils are not exposed to risks to their health and safety. This applies to activities on or off the school premises.

The school board, as the employer, also has a duty to:

- Assess the risks to staff and others affected by school activities in order to identify and introduce the health and safety measures necessary to manage those risks
- Inform employees about risks and the measures in place to manage them
- Ensure that adequate health and safety training is provided

### **3.2 Principal**

The Principal is responsible for health and safety day-to-day. This involves:

- Implementing the health and safety policy
- Ensuring there is enough staff to safely supervise pupils
- Ensuring that the school building and premises are safe and regularly inspected
- Providing adequate training for school staff
- Reporting to the Board of Directors on health and safety matters
- Ensuring appropriate evacuation procedures are in place and regular fire drills are held
- Ensuring that in their absence, health and safety responsibilities are delegated to another member of staff
- Ensuring all risk assessments are completed and reviewed
- Monitoring cleaning contracts, and ensuring cleaners are appropriately trained and have access to personal protective equipment, where necessary

In the Principal's absence, the Head of Secondary assumes the above day-to-day health and safety responsibilities.

### **3.3 Health and safety lead**

The nominated health and safety lead is The Head of Secondary.

### **3.4 Staff**

School staff have a duty to take care of pupils in the same way that a prudent parent would do so.

Staff will:

- Take reasonable care of their own health and safety and that of others who may be affected by what they do at work
- Co-operate with the school on health and safety matters
- Work in accordance with training and instructions
- Inform the appropriate person of any work situation representing a serious and immediate danger so that remedial action can be taken
- Model safe and hygienic practice for pupils
- Understand emergency evacuation procedures and feel confident in implementing them

### **3.5 Pupils and parents**

Pupils and parents are responsible for following the school's health and safety advice, on-site and off-site, and for reporting any health and safety incidents to a member of staff.

### **3.6 Contractors**

Contractors will agree health and safety practices with the headteacher before starting work. Before work begins the contractor will provide evidence that they have completed an adequate risk assessment of all their planned work.

## **4. Site security**

The operations manager & school service coordinator are responsible for the security of the school site in and out of school hours. They are responsible for visual inspections of the site, and for the intruder and fire alarm systems.

The school service coordinator, and the security guards are key holders and will respond to an emergency 24 hours a day, 365 days a year.

## 5. Fire

Emergency exits, assembly points and assembly point instructions are clearly identified by safety signs and notices. Fire risk assessment of the premises will be reviewed regularly.

Emergency evacuations are practised at least once a term.

The fire alarm is a loud continuous bell.

Fire alarm testing will take place once a month or urgent request.

New staff will be trained in fire safety and all staff and pupils will be made aware of any new fire risks.

In the event of a fire:

- The alarm will be raised immediately by whoever discovers the fire and emergency services contacted. Evacuation procedures will also begin immediately
- Fire extinguishers may be used by staff only, and only then if staff are trained in how to operate them and are confident they can use them without putting themselves or others at risk
- Staff and pupils will congregate at the assembly points. The assembly point for all is the football pitch.
- Form tutors/class teachers will take a register of pupils, which will then be checked against the attendance register of that day
- The Heads of Secondary, Primary and the Operations Manager will take register of all secondary, primary and admin/contractor staff respectively
- Staff and pupils will remain outside the building until the emergency services say it is safe to re-enter
- The school will have special arrangements in place for the evacuation of people with mobility needs and fire risk assessments will also pay particular attention to those with disabilities
- Any staff in building 1 that are not directly supervising children will support the evacuation of nursery children if they are already in the building
- Specific plans will be in place for any student or staff member with specific mobility needs. This will be included in the personal emergency evacuation plans (PEEPs).

A fire safety checklist can be found in appendix 1.

## 6. COSHH

Schools are required to control hazardous substances, which can take many forms, including:

- Chemicals
- Products containing chemicals
- Fumes
- Dusts
- Vapours
- Mists
- Gases and asphyxiating gases
- Germs that cause diseases, such as leptospirosis or legionnaires disease

Control of substances hazardous to health (COSHH) risk assessments are completed by operations manager and circulated to all employees who work with hazardous substances. Staff will also be provided with protective equipment, where necessary.

Our staff use and store hazardous products in accordance with instructions on the product label. All hazardous products are kept in their original containers, with clear labelling and product information.

Any hazardous products are disposed of in accordance with specific disposal procedures.

Emergency procedures, including procedures for dealing with spillages, are displayed near where hazardous products are stored and in areas where they are routinely used.

### **6.1 Gas safety**

- Installation, maintenance and repair of gas appliances and fittings will be carried out by Seahawk staff
- Gas pipework, appliances and flues are regularly maintained
- All rooms with gas appliances are checked to ensure that they have adequate ventilation

### **6.2 Legionella**

- A water risk assessment has been completed on 21 Sept 2018 by Seahawk Maintenance Staff. Mr. Jirapat Kamta (role in school) is responsible for ensuring that the identified operational controls are conducted and recorded in the school's water log book
  - This risk assessment will be reviewed every month and when significant changes have occurred to the water system and/or building footprint
  - The risks from legionella are mitigated by the following:
    - Avoidance of Conditions Favouring Growth of Organisms
- (i) As far as practicable, water systems will be operated at temperatures that do not favour the growth of legionella. The recommended temperature for hot water is 60°C and either above 50°C or below 20°C for distribution, as care must be taken to protect people from exposure to very hot water.
- (ii) The use of materials that may provide nutrients for microbial growth will be avoided. Corrosion, scale deposition and build up of bio films and sediments will be controlled and tanks will be lidded.

#### Monitoring and recording

- Temperatures of water outlets will be checked and recorded to ensure correct temperature to prevent bacterial growth are maintained.

#### Disinfection

- Periodic disinfection of shower heads to remove any scale and bacteria.

#### Flushing of water system

- The water system should be flushed through after a significant holidays to remove standing water in pipes that provide ideal conditions for the legionnaire bacteria. Water is regularly checked by Department of Water Supplies.

#### Emergency procedures

- Establish emergency procedures.
- If during routine sampling/inspection of hot and cold water systems Legionella bacteria is discovered in any systems likely to provide a medium for the spread of infection (e.g. water aerosol spraying equipment), these will be shut down and the situation reported immediately to the Operations Manager.

#### Training

- Provide training to Seahawk staff responsible for the day to day management of the water systems.

### **6.3 Asbestos (There is none in the school)**

- Staff are briefed on the hazards of asbestos, the location of any asbestos in the school and the action to take if they suspect they have disturbed it
- Arrangements are in place to ensure that contractors are made aware of any asbestos on the premises and that it is not disturbed by their work
- Contractors will be advised that if they discover material which they suspect could be asbestos, they will stop work immediately until the area is declared safe

- A record is kept of the location of asbestos that has been found on the school site and will be periodically assessed for deterioration.

## **7. Equipment**

- All equipment and machinery is maintained in accordance with the manufacturer's instructions. In addition, maintenance schedules outline when extra checks should take place
- When new equipment is purchased, it is checked to ensure that it meets appropriate educational standards
- All equipment is stored in the appropriate storage containers and areas. All containers are labelled with the correct hazard sign and contents

### **7.1 Electrical equipment**

- All staff are responsible for ensuring that they use and handle electrical equipment sensibly and safely
- Any pupil or volunteer who handles electrical appliances does so under the supervision of the member of staff who so directs them
- Any potential hazards will be reported to the operations manager immediately
- Permanently installed electrical equipment is connected through a dedicated isolator switch and adequately earthed
- Only trained staff members can check plugs
- Where necessary a portable appliance test (PAT) will be carried out by a competent person
- All isolators switches are clearly marked to identify their machine
- Electrical apparatus and connections will not be touched by wet hands and will only be used in dry conditions
- Maintenance, repair, installation and disconnection work associated with permanently installed or portable electrical equipment is only carried out by a competent person

### **7.2 PE equipment**

- Pupils are taught how to carry out and set up PE equipment safely and efficiently. Staff check that equipment is set up safely
- Any concerns about the condition of the gym floor or other apparatus will be reported to the operations manager.

## **8. Lone working**

Lone working may include:

- Late working
- Home or site visits
- Weekend working
- Site manager duties
- Site cleaning duties
- Working in a single occupancy office

Potentially dangerous activities, such as those where there is a risk of falling from height, will not be undertaken when working alone. If there are any doubts about the task to be performed then the task will be postponed until other staff members are available.

If lone working is to be undertaken, a colleague, friend or family member will be informed about where the member of staff is and when they are likely to return. The security guard will always be informed and there is a signing in/out book for working outside of normal school operating hours.

The lone worker will ensure that they are medically fit to work alone.

## 9. Working at height

We will ensure that work is properly planned, supervised and carried out by competent people with the skills, knowledge and experience to do the work. Risk assessments must be in place.

In addition:

- The maintenance staff retains ladders for working at height
- Pupils are prohibited from using ladders
- Staff will wear appropriate footwear and clothing when using ladders
- Contractors are expected to provide their own ladders for working at height
- Before using a ladder, staff are expected to conduct a visual inspection to ensure its safety
- Access to high levels, such as roofs, is only permitted by trained persons

## 10. Manual handling

It is up to individuals to determine whether they are fit to lift or move equipment and furniture. If an individual feels that to lift an item could result in injury or exacerbate an existing condition, they will ask for assistance.

The school will ensure that proper mechanical aids and lifting equipment are available in school, and that staff are trained in how to use them safely.

Staff and pupils are expected to use the following basic manual handling procedure:

- Plan the lift and assess the load. If it is awkward or heavy, use a mechanical aid, such as a trolley, or ask another person to help
- Take the more direct route that is clear from obstruction and is as flat as possible
- Ensure the area where you plan to offload the load is clear
- When lifting, bend your knees and keep your back straight, feet apart and angled out. Ensure the load is held close to the body and firmly. Lift smoothly and slowly and avoid twisting, stretching and reaching where practicable

## 11. Off-site visits

When taking pupils off the school premises, we will ensure that:

- Risk assessments will be completed where off-site visits and activities require them
- All off-site visits are appropriately staffed
- Staff will take a school mobile phone, a portable first aid kit, information about the specific medical needs of pupils along with the parents' contact details
- There will always be at least one first aider on school trips and visits
- There will always be at least one first aider with a current paediatric first aid certificate on school trips and visits for the Early Years Foundation Stage.

## 12. Weekend School

This policy applies to Weekend School. Those who use any aspect of the school site or any facilities will be made aware of the content of the school's health and safety policy, and will have responsibility for complying with it.

## **13. Violence at work**

We believe that staff should not be in any danger at work, and will not tolerate violent or threatening behaviour towards our staff.

All staff will report any incidents of aggression or violence (or near misses) directed to themselves to their line manager/headteacher immediately. This applies to violence from pupils, visitors or other staff.

## **14. Smoking**

Smoking is not permitted anywhere on the school premises.

## **15. Infection prevention and control**

We will encourage staff and pupils to follow this good hygiene practice, outlined below, where applicable in order to minimise the risk of the spread of infection.

### **15.1 Handwashing**

- Wash hands with liquid soap and warm water, and dry with paper towels
- Always wash hands after using the toilet, before eating or handling food, and after handling animals
- Cover all cuts and abrasions with waterproof dressings

### **15.2 Coughing and sneezing**

- Cover mouth and nose with a tissue
- Wash hands after using or disposing of tissues
- Spitting is discouraged

### **15.3 Personal protective equipment**

- Wear disposable non-powdered vinyl or latex-free CE-marked gloves and disposable plastic aprons where there is a risk of splashing or contamination with blood/body fluids (for example, nappy or pad changing)
- Wear goggles if there is a risk of splashing to the face
- Use the correct personal protective equipment when handling cleaning chemicals

### **15.4 Cleaning of the environment**

- Clean the environment, including toys and equipment, frequently and thoroughly

### **15.5 Cleaning of blood and body fluid spillages**

- Clean up all spillages of blood, faeces, saliva, vomit, nasal and eye discharges immediately and wear personal protective equipment
- When spillages occur, clean using a product that combines both a detergent and a disinfectant and use as per manufacturer's instructions. Ensure it is effective against bacteria and viruses and suitable for use on the affected surface
- Never use mops for cleaning up blood and body fluid spillages – use disposable paper towels and discard clinical waste as described below
- Make spillage kits available for blood spills

### **15.6 Laundry**

- Wash laundry in a separate dedicated facility
- Wash soiled linen separately and at the hottest wash the fabric will tolerate
- Wear personal protective clothing when handling soiled linen

- Bag children's soiled clothing to be sent home, never rinse by hand

### **15.7 Clinical waste**

- Always segregate domestic and clinical waste, in accordance with local policy
- Used nappies/pads, gloves, aprons and soiled dressings are stored in correct clinical waste bags in foot-operated bins
- Remove clinical waste with a registered waste contractor (The District Office)
- Remove all clinical waste bags when they are two-thirds full and store in a dedicated, secure area while awaiting collection

### **15.8 Animals**

- Wash hands before and after handling any animals
- Keep animals' living quarters clean and away from food areas
- Dispose of animal waste regularly, and keep litter boxes away from pupils
- Supervise pupils when playing with animals
- Seek veterinary advice on animal welfare and animal health issues, and the suitability of the animal as a pet

### **15.9 Pupils vulnerable to infection**

Some medical conditions make pupils vulnerable to infections that would rarely be serious in most children. The school will normally have been made aware of such vulnerable children. These children are particularly vulnerable to chickenpox, measles or slapped cheek disease (parvovirus B19) and, if exposed to either of these, the parent/carer will be informed promptly and further medical advice sought. Advise these children to have additional immunisations, for example for pneumococcal and influenza.

### **15.10 Exclusion periods for infectious diseases**

The school will follow recommended exclusion periods outlined by District Office Department of Public Health and the Department of the Environment, summarised in appendix 4.

In the event of an epidemic/pandemic, we will follow advice from District Office Department of Public Health and the Department of the Environment, about the appropriate course of action.

## **16. New and expectant mothers**

Risk assessments will be carried out whenever any employee or pupil notifies the school that they are pregnant.

Appropriate measures will be put in place to control risks identified. Some specific risks are summarised below:

- Chickenpox can affect the pregnancy if a woman has not already had the infection. Expectant mothers should report exposure to antenatal carer and GP at any stage of exposure. Shingles is caused by the same virus as chickenpox, so anyone who has not had chickenpox is potentially vulnerable to the infection if they have close contact with a case of shingles
- If a pregnant woman comes into contact with measles or German measles (rubella), she should inform her antenatal carer and GP immediately to ensure investigation
- Slapped cheek disease (parvovirus B19) can occasionally affect an unborn child. If exposed early in pregnancy (before 20 weeks), the pregnant woman should inform her antenatal care and GP as this must be investigated promptly

## **17. Occupational stress**

We are committed to promoting high levels of health and wellbeing and recognise the importance of identifying and reducing workplace stressors through risk assessment.

Systems are in place within the school for responding to individual concerns and monitoring staff workloads.

Stress at work can come about for a variety of reasons. It may be excessive workload, unreasonable expectations, or overly-demanding work colleagues. The school will endeavour to ensure a pleasant working environment and that employees are as free from stress as possible.

We will:

- work to identify all workplace stressors and conduct risk assessments to eliminate stress or control the risks from stress
- regularly review risk assessments
- consult with employees on issues relating to the prevention of work-related stress
- provide access to confidential counselling for employees affected by stress caused either by work or external factors
- provide training for all managers and supervisory staff in good management practices

Employees who experience unreasonable stress which they think may be caused by work should raise their concerns with their manager or through the school's grievance procedure.

Following action to reduce the risks, they shall be reassessed. If the risks remain unsustainable by the employee concerned, efforts shall be made to reassign that person to other work for which the risks are assessed as tolerable.

## **18. Accident reporting**

### **18.1 Accident record - on PASS**

- An accident report will be completed on PASS as soon as possible after the accident occurs by the member of staff or first aider who deals with it.
- As much detail as possible will be supplied when reporting an accident
- Information about injuries will also be kept in the pupil's educational record via PASS
- In addition, a record of any follow-up action will be kept on file (Appendix 2)
- Records held in the first aid and accident book will be retained by the school for a minimum of 3 years, in accordance with regulation 25 of the Social Security (Claims and Payments) Regulations 1979, and then securely disposed of.

### **18.2 Reporting to the Public Health Department (Chatuchak District Office)**

The School Nurse and Operations manager will keep a record of any accident which results in a reportable injury, disease, or dangerous occurrence

The School Director will report these to the Public Health Department as soon as is reasonably practicable and in any event within 10 days of the incident.

Reportable injuries, diseases or dangerous occurrences include:

- Death
- Specified injuries. These are:
  - Fractures, other than to fingers, thumbs and toes
  - Amputations
  - Any injury likely to lead to permanent loss of sight or reduction in sight
  - Any crush injury to the head or torso causing damage to the brain or internal organs
  - Serious burns (including scalding)
  - Any scalping requiring hospital treatment
  - Any loss of consciousness caused by head injury or asphyxia
  - Any other injury arising from working in an enclosed space which leads to hypothermia or heat-induced illness, or requires resuscitation or admittance to hospital for more than 24 hours

- Injuries where an employee is away from work or unable to perform their normal work duties for more than 7 consecutive days
- Where an accident leads to someone being taken to hospital
- Where something happens that does not result in an injury, but could have done
- Near-miss events that do not result in an injury, but could have done. Examples of near-miss events relevant to schools include, but are not limited to:
  - The collapse or failure of load-bearing parts of lifts and lifting equipment
  - The accidental release of a biological agent likely to cause severe human illness
  - The accidental release or escape of any substance that may cause a serious injury or damage to health
  - An electrical short circuit or overload causing a fire or explosion

### **18.3 Notifying parents**

The school nurse, will inform parents of any accident or injury sustained by a pupil, and any first aid treatment given, on the same day, or as soon as reasonably practicable.

## **19. Training**

Our staff are provided with health and safety training as part of their induction process.

Staff who work in high risk environments, such as in science labs or with woodwork equipment, or work with pupils with special educational needs (SEN), are given additional health and safety training.

## **20. Monitoring**

This policy will be reviewed annually by the Head of Secondary.

At every review, the policy will be approved by the Principal and the School Board.

## **21. Links with other policies**

This health and safety policy links to the following policies:

- First aid
- Risk assessment
- Accessibility plan
- Trips policy

## **Appendix 1. Fire safety checklist**

Issue to check	Yes/No
----------------	--------

Are fire regulations prominently displayed?	
Is fire-fighting equipment, including fire blankets, in place?	
Does fire-fighting equipment give details for the type of fire it should be used for?	
Are fire exits clearly labelled?	
Are fire doors fitted with self-closing mechanisms?	
Are flammable materials stored away from open flames?	
Do all staff and pupils understand what to do in the event of a fire?	
Can you easily hear the fire alarm from all areas?	

## Appendix 2. Accident report

<b>Name of injured person</b>		<b>Role/class</b>	
<b>Date and time of incident</b>		<b>Location of incident</b>	
<b>Incident details</b>			
<i>Describe in detail what happened, how it happened and what injuries the person incurred</i>			
<b>Action taken</b>			
<i>Describe the steps taken in response to the incident, including any first aid treatment, and what happened to the injured person immediately afterwards.</i>			
<b>Follow-up action required</b>			
<i>Outline what steps the school will take to check on the injured person, and what it will do to reduce the risk of the incident happening again</i>			
<b>Name of person attending the incident</b>			
<b>Signature</b>		<b>Date</b>	

**Appendix 3. Asbestos record**

Location	Product	How much	Surface coating	Condition	Ease of access	Asbestos type	Comment

## Appendix 4. Recommended absence period for preventing the spread of infection (see additional document)

### Rashes and skin infections

Infection or complaint	Recommended period to be kept away from school or nursery	Comments
<b>Athlete's foot</b>	None	Athlete's foot is not a serious condition. Treatment is recommended.
<b>Chickenpox</b>	Until all vesicles have crusted over	Some medical conditions make children vulnerable to infections that would rarely be serious in most children, these include those being treated for leukaemia or other cancers. These children are particularly vulnerable to chickenpox. Chickenpox can also affect pregnancy if a woman has not already had the infection.
<b>Cold sores (herpes simplex)</b>	None	Avoid kissing and contact with the sores. Cold sores are generally mild and self-limiting.
<b>German measles (rubella)*</b>	Four days from onset of rash (as per " <a href="#">Green Book</a> ")	Preventable by immunisation (MMR x2 doses). If a pregnant woman comes into contact with German measles she should inform her GP and antenatal carer immediately to ensure investigation.
<b>Hand, foot and mouth</b>	7 days	
<b>Impetigo</b>	Until lesions are crusted and healed, or 48 hours after starting antibiotic treatment	Antibiotic treatment speeds healing and reduces the infectious period.
<b>Measles*</b>	Four days from onset of rash	Preventable by immunisation (MMR x2 doses). Some medical conditions make children vulnerable to infections that would rarely be serious in most children, these include those being treated for leukaemia or other cancers. These children are particularly vulnerable to measles. Measles during pregnancy can result in early delivery or even loss of the baby. If a pregnant woman is exposed she should immediately inform whoever is giving antenatal care to ensure investigation.
<b>Molluscum contagiosum</b>	None	A self-limiting condition.

<b>Ringworm</b>	Exclusion not usually required	Treatment is required.
<b>Roseola (infantum)</b>	None	
<b>Scabies</b>	Child can return after first treatment	Household and close contacts require treatment.
<b>Scarlet fever*</b>	Child can return 24 hours after starting appropriate antibiotic treatment	Antibiotic treatment is recommended for the affected child.
<b>Slapped cheek syndrome/fifth disease (parvovirus B19)</b>	None (once rash has developed)	Some medical conditions make children vulnerable to infections that would rarely be serious in most children, these include those being treated for leukaemia or other cancers. These children are particularly vulnerable to parvovirus B19. Slapped cheek disease (parvovirus B19) can occasionally affect an unborn child. If exposed early in pregnancy (before 20 weeks), inform whoever is giving antenatal care as this must be investigated promptly.
<b>Shingles</b>	Exclude only if rash is weeping and cannot be covered	Can cause chickenpox in those who are not immune, i.e. have not had chickenpox. It is spread by very close contact and touch. If further information is required, contact your local PHE centre. Some medical conditions make children vulnerable to infections that would rarely be serious in most children, these include those being treated for leukaemia or other cancers. These children are particularly vulnerable to shingles. Shingles can also affect pregnancy if a woman has not already had chickenpox.
<b>Warts and verrucae</b>	None	Verrucae should be covered in swimming pools, gymnasiums and changing rooms.

## Diarrhoea and vomiting illness

<b>Infection or complaint</b>	<b>Recommended period to be kept away from school or nursery</b>	<b>Comments</b>
<b>Diarrhoea and/or vomiting</b>	48 hours from last episode of diarrhoea or vomiting	
<b>E. coli O157 VTEC Typhoid* [and</b>	Should be excluded for 48 hours from the last episode of diarrhoea. Further exclusion may be	Further exclusion is required for children aged 5 years or younger and those who have difficulty in adhering to hygiene practices. Children in these categories should be excluded until there is evidence of microbiological clearance. This guidance may also apply to some contacts

<b>paratyphoid* ] (enteric fever) Shigella (dysentery)</b>	required for some children until they are no longer excreting	who may also require microbiological clearance. Please consult your local PHE centre for further advice
<b>Cryptosporidiosis</b>	Exclude for 48 hours from the last episode of diarrhoea	Exclusion from swimming is advisable for two weeks after the diarrhoea has settled
<b>Rotavirus*</b>	Exclude 24 hours after the last episode of diarrhoea and vomiting. A medical report is required on return to school.	If Rotavirus outbreak is suspected, food and water will be tested. Reminder to staff and children to wash hands thoroughly after using the toilet.

## Respiratory infections

<b>Infection or complaint</b>	<b>Recommended period to be kept away from school or nursery</b>	<b>Comments</b>
<b>Flu (influenza)</b>	Until recovered	Some medical conditions make children vulnerable to infections that would rarely be serious in most children, these include those being treated for leukaemia or other cancers. It may be advisable for these children to have additional immunisations, for example pneumococcal and influenza.
<b>Tuberculosis*</b>	Always consult your local PHE centre	Some medical conditions make children vulnerable to infections that would rarely be serious in most children, these include those being treated for leukaemia or other cancers. It may be advisable for these children to have additional immunisations, for example pneumococcal and influenza.
<b>Whooping cough*</b>	Five days from starting antibiotic treatment, or 21 days from onset of illness if no antibiotic treatment	Preventable by vaccination. After treatment, non-infectious coughing may continue for many weeks. Your local PHE centre will organise any contact tracing necessary.
<b>Respiratory syncytial virus (RSV)*</b>	Until fever is gone and child is well enough to return to normal activities.	A medical report is required on return to school.

## Other infections

Infection or complaint	Recommended period to be kept away from school or nursery	Comments
<b>Conjunctivitis</b>	None	If an outbreak/cluster occurs, consult your local PHE centre.
<b>Diphtheria*</b>	Exclusion is essential. Always consult with your local HPT	Family contacts must be excluded until cleared to return by your local PHE centre. Preventable by vaccination. Your local PHE centre will organise any contact tracing necessary.
<b>Glandular fever</b>	None	
<b>Head lice</b>	None	Treatment is recommended only in cases where live lice have been seen.
<b>Hepatitis A*</b>	Exclude until seven days after onset of jaundice (or seven days after symptom onset if no jaundice)	In an outbreak of hepatitis A, your local PHE centre will advise on control measures.
<b>Hepatitis B*, C*, HIV/AIDS</b>	None	Hepatitis B and C and HIV are bloodborne viruses that are not infectious through casual contact. All spillages of blood should be cleaned up immediately (always wear PPE). When spillages occur, clean using a product that combines both a detergent and a disinfectant. Use as per manufacturer's instructions and ensure it is effective against bacteria and viruses and suitable for use on the affected surface. Never use mops for cleaning up blood and body fluid spillages – use disposable paper towels and discard clinical waste as described below. A spillage kit should be available for blood spills.
<b>Meningococcal meningitis*/ septicaemia*</b>	Until recovered	Meningitis C is preventable by vaccination There is no reason to exclude siblings or other close contacts of a case. In case of an outbreak, it may be necessary to provide antibiotics with or without meningococcal vaccination to close school contacts. Your local PHE centre will advise on any action is needed.
<b>Meningitis* due to other bacteria</b>	Until recovered	Hib and pneumococcal meningitis are preventable by vaccination. There is no reason to exclude siblings or other close contacts of a case. Your local PHE centre will give advice on any action needed.

<b>Meningitis viral*</b>	None	Milder illness. There is no reason to exclude siblings and other close contacts of a case. Contact tracing is not required.
<b>MRSA</b>	None	Good hygiene, in particular handwashing and environmental cleaning, are important to minimise any danger of spread. If further information is required, contact your local PHE centre.
<b>Mumps*</b>	Exclude child for five days after onset of swelling	Preventable by vaccination
<b>Threadworms</b>	None	Treatment is recommended for the child and household contacts.
<b>Tonsillitis</b>	None	There are many causes, but most cases are due to viruses and do not need an antibiotic.

\* denotes a notifiable disease – to the Department of Public Health.
